---

I attended the public meeting about the proposed apartments in Upton the other day and I share most of the concerns expressed there.

In addition, I am concerned that in the future the developers may expand their project beyond its current scope. I'm worried that, directly or indirectly, other nearby parcels might be used to expand or support the project. 0 School Street is an example but there are possibilities. In the future, could a driveway be used to connect to School St? Could additional parking spots be made or could other parcels be used in other ways?

Thanks,

David Seligman
