

Our Story

Celebrating 30 years, Mangel DeStefano Architects is a New England-based award-winning architectural firm that shapes exceptional designs for multifamily, custom residential, health-care, industrial, science & advanced tech and corporate real estate facilities across the Northeastern United States. The firm was named 2023 Architectural Firm of the Year by the Boston Real Estate Times' Excellence Awards in Commercial Real Estate.

With a staff of 40 professionals in strategic planning, architecture, and interior design, Mangel DeStefano has the expertise to provide services for everything from long-range master planning, to the design and execution of complex multi-million dollar construction projects and asset repositioning.

We are fortunate to have a wide range of housing experience that includes the design and renovation of apartment and condominium complexes, affordable housing, retirement communities, and mixed-use developments. Mangel DeStefano's residential projects are designed with people in mind: the clients who collaborate on the design process; the people who will work, live or play in the space; and the people who may use it in the future.

We take the long view beginning with our first conversation. It is our responsibility to understand your wishes and leverage our expertise to present an array of pathways you can take to achieve your vision. We value long term partnerships with our clients, many of whom choose Mangel DeStefano time and again to help them realize their vision.
