James Meyer  
35 Fiske Ave

Two comments to add:

1. There was a 2-hour delay on Jan 10, 2024 as reflected in history here (<https://www.mursd.org/live-feed>). Beyond 7-8am being before school traffic...there was a delay. Referencing “discussions with police detail” is not something that should be entered into this study as they mentioned at the Feb 21, 2024 meeting.
2. Figure 8 shows the projected post-project traffic. It appears VAI is only anticipating 14 cars leaving in the morning (7-8am) and 16 cars returning in mid afternoon (4-5pm). For 68-units, how many cars are they anticipating? Imagine 120-130 cars. We are estimating 12% will be working/commuting? Where will these residents work? I strongly suggest we review the overall traffic flow and not just a 1 hour early in the morning and 1 hour mid afternoon to understand the total safety impact to Fiske Ave and the related intersection at Main st.

Best,  
James Meyer
