To: Amy Bonina <abonina@uptonma.gov>

Hi Amy,

I tried sending this to Joe Lydon to post on the ZBA website under the 40B tab and got a reply he would be out of the office until the 22? Could you please post this on the site for me? Thank you!

Subject: ConCom meeting 7/11/2024

Hello,

I was not able to attend the latest ConCom meeting 7/11/24. I watched the recording and was blown away by the wetland scientists characterization of the current conditions of the proposed build site and that of my property directly across Rt.140. I would like the time stamp of 1:20:45 on the video of the meeting uploaded to YouTube along with the pictures of my property (I took tonight 7/12/24) and this email communication uploaded to the ZBA's website so residents can see what a professional hired by the developer described as "dry as can be" and the actual conditions Can you see the blue flags in the photos?? I'm definitely not an engineer, but I would bet everything I own that those blue flags mean the complete opposite of "dry as can be" The fact that a hired professional made these statements is beyond troubling. Take a look, I believe this is the finest of many examples of the builder (and the ZBA frankly) paying "unbiased" professionals to say what they need them to, to force this project through regardless of the facts, the law, and what the community at large really wants. I am not an engineer or a scientist this is only the opinion of someone (me) who still holds common sense in high regard.

Thank you for your help,

Kevin McLaughlin
